

Arizona Private School Tax Credit Program and School Tuition Organizations (STO)

The Arizona Private School Tuition Tax Credit Law, (A.R.S. AZ 43-1089), allows Arizona taxpayers to contribute to a qualified School Tuition Organization (STO) and receive a dollar-for-dollar state tax credit. The contribution may be recommended for a private school, such as **Summit School**, or for a student attending a private school in Arizona.

Summit School collects Tax Credits:

Arizona state law prohibits parents from making a private school tax credit on behalf of their own child; therefore, Summit School greatly appreciates your tax credit contribution made to **The Institute for Better Education, (IBE) on behalf of Summit School**. Our school utilizes tax credit contributions to fund our need-based, student tuition assistance awards each year.

Recommended Student Tax Credits:

Arizona taxpayers may also contribute to a STO and recommend a student, attending a private school as the recipient. Parents set up their student's tax credit account by selecting their preferred STO and completing the STO's annual application. A new application is required each spring with recent pay statement(s). Then parents let their family and friends know about the Tax Credit and how to make a tax credit contribution on behalf of their student(s) through their preferred STO.

STOs: For a list of Arizona certified STO's please visit <https://azdor.gov/tax-credits/certification-school-tuition-organizations>. Below are some of the STO's that assist our families. Please visit their websites to access current applications and for more information. Families usually select one, preferred STO to share with their family and friends in asking for a recommended tax credit contribution for their student(s). However, families may apply to multiple STOs for possible financial aid general awards dependent upon each STO's available annual funding.
